Test Case ID	**TC01** - View Records Page - Successfully summarizing patient data
Objective	Successfully summarize patient data
Preconditions	The Doctor must have signed in to the portal, selected a patient, and pressed the view button
Assumptions	The selected patient has information that can be summarized
Test Steps	1. The doctor selects the summarize button 2. The doctor enters a prompt to summarize multiple specific fields 3. The doctor selects the send button
Input Values	Summarize and send buttons, input string for prompt
Expected Results	A summary for every specified field in the prompt will appear below the send button. The summary will be received in under 10 seconds. The summary will not leave out any critical information in the opinion of the tester.

Test Case ID	**TC02** - View Records Page - Asking to summarize information that does not exist
Objective	Asking to summarize information that does not exist
Preconditions	The Doctor must have signed in to the portal, selected a patient, and pressed the view button
Assumptions	There is a field in the patient record which does not hold any information
Test Steps	1. The doctor selects the summarize button 2. The doctor enters a prompt to summarize one field that exists and has information, one field which exists but does not have any information, and one field which does not exist in the record 3. The doctor selects the send button
Input Values	Summarize and send buttons, input string for prompt
Expected Results	The summary below will contain a summary for the field which does have information and (no data) will be displayed for the ones that do not exist. The summary will be received in under 10 seconds.

Test Case ID	**TC03** - View Records Page - Successfully finding comparable patients
Objective	Successfully finding comparable patients
Preconditions	The Doctor must have signed in to the portal, selected a patient, and pressed the view button
Assumptions	The selected patient has information that can be compared
Test Steps	1. The doctor selects the compare button 2. The doctor enters a prompt specifying the fields or information they wish to be compared when finding similar patients 3. The doctor selects the send button
Input Values	Compare and send buttons, input string for prompt
Expected Results	The 5 most similar patient's emails will appear below the send button. The user should be able to click the dropdown next to each email to see their anonymized information.

Test Case ID	**TC04** - View Records Page - Asking to compare fields that don't exist
Objective	Asking to compare fields that don't exist
Preconditions	The Doctor must have signed in to the portal, selected a patient, and pressed the view button
Assumptions	The selected patient has information that can be compared
Test Steps	1. The doctor selects the compare button 2. The doctor enters a prompt specifying the fields or information they wish to be compared when finding similar patients, they must specify a field which does not exist in the record 3. The doctor selects the send button
Input Values	Compare and send buttons, input string for prompt
Expected Results	The error message "One or more of your specified fields were not found in the patient record. Please refine your prompt and try again." should be displayed below the send button
